

## EMPOWERING LIVES, THROUGH UNRIVALLED HEALTHCARE TECHNOLOGIES

**F**or 25 years, Trivitron Healthcare has stood at the helm of a major healthcare transformation, by breathing innovation, developing cutting-edge medical technologies, rendering equal healthcare support & opportunities, battling pandemics, and building a great culture to thrive in. Its peerless commitment to healthcare has stemmed from its core focus on three pillars - People, Processes and Performance.

Trivitron draws its greatest strength from its emerging technologies that have rapidly changed the medtech landscape and opened up new avenues for progress in the healthcare industry. By investing in meaningful innovations and taking novel approaches to manufacturing products, Trivitron Healthcare has applied cutting-edge medical solutions to real-world problems, thereby developing breakthrough solutions.

In the process of reimagining the Indian Healthcare ecosystem, Trivitron has built increasing resilience to future contagions, enabled broader access to care with improved and accessible diagnostics, and delivered higher imaging intelligence, without sacrificing on quality. This has also transformed unsustainable healthcare systems into sustainable ones, and provided cheaper, faster and more effective solutions for diseases.

Spearheading innovation in the fields of Newborn Screening, In-Vitro Diagnostics, Imaging & Radiology, Radiation Protection, Critical Care and Operating Room Solutions, today Trivitron has engraved its name as a holistic healthcare

provider with solid expertise in research & development, and manufacturers and distributes exceptional medical technology products to over 180 countries.

Receiver of many prestigious awards and accolades, Trivitron Healthcare has recently been honoured and presented with the Great Place to Work™ certification, as a validation for its values, culture, centricity, and efforts to nurture its talent pool. This 'Gold Standard' of a milestone was successfully achieved through the relentless passion, hard work and dedication of every employee who has aligned himself with the Group's vision and contributed to co-creating a great culture of value, happiness and success.

From marketing radiation protection products to clinics, to developing Real-Time PCR-based kits for the detection of Monkeypox (Orthopoxvirus) virus, Sky is indeed the limit for Trivitron Healthcare. Its motto of "speaking your language" reiterates commitment to providing customized products and services and making this world a happier and a healthier place for all.
