# ABOUT STAR TRIVITRON

STAR Trivitron was formed with a purpose to make the world's best medical technologies accessible to healthcare professionals in the most cost effective manner. We have always ensured that our customers receive best in class medical solutions every time. Over a decade of committed services Star Trivitron is now one of the most preferred healthcare brands in the GCC, Middle East and African markets.

# Mission

To provide medical technology products, services & solutions and make healthcare affordable and accessible in the MENA Region.

The company was incorporated in the year 2006, with a view to provide the vital link between healthcare and technology. The company focuses primarily on trading in Medical/Diagnostic/Imaging Equipment, Consumables, and Disposables of various disciplines.

Combining cost efficiencies with reputed MNC partners, strong technical support as well as own manufacturing & R&D initiatives in India & Finland, Star Trivitron has created an unique framework of integrated chain of end-to-end services, launching breakthrough medical technologies.

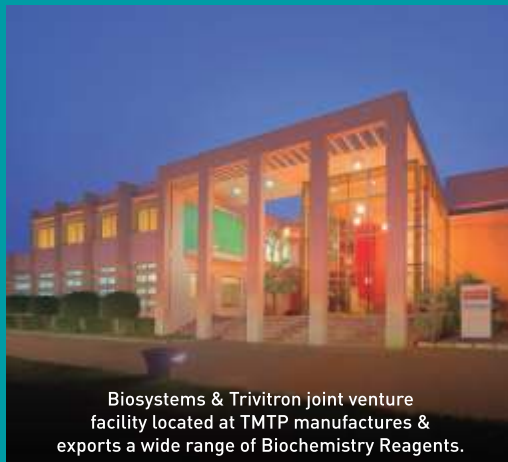

# MANUFACTURING FACILITIES

CE / US FDA certified Kiran Medical Systems at Mumbai facility manufactures and exports Radiology accessories, components & Radiation Protection Products.

LabSystems Diagnostics facility in Finland manufactures and exports CE certified Newborn Screening and Diagnostics kits for Gastro, Cardiac Panel and Infectious Diseases.
